⚠ WARNING: PHOTOSENSITIVITY/EPILEPSY/SEIZURES

A very small percentage of individuals may experience epileptic seizures or blackouts when exposed to certain light patterns or flashing lights. Exposure to certain patterns or backgrounds on a television screen or when playing video games may trigger epileptic seizures or blackouts in these individuals. These conditions may trigger previously undetected epileptic symptoms or seizures in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition or has had seizures of any kind, consult your doctor before playing.

IMMEDIATELY DISCONTINUE use and consult your doctor before resuming gameplay if you or your child experience any of the following health problems or symptoms:

• dizziness • eye or muscle twitches • disorientation • any involuntary movement

• altered vision • loss of awareness • seizures or convulsion.

RESUME GAMEPLAY ONLY ON APPROVAL OF YOUR DOCTOR.

⚠ WARNING: PHOTOSENSITIVITY/EPILEPSY/SEIZURES

USE AND HANDLING OF VIDEO GAMES TO REDUCE THE LIKELIHOOD OF A SEIZURE

- Use in a well-lit area and keep as far a way as possible from the screen.
- Avoid prolonged use of the PS Vita system. Take a 15-minute break during each hour of play.
- Avoid playing when you are tired or need sleep.

Stop using the system immediately if you experience any of the following symptoms: lightheadedness, nausea, or a sensation similar to motion sickness; discomfort or pain in the eyes, ears, hands, arms, or any other part of the body. If the condition persists, consult a doctor.
